REPORT OF TRAINING PROGRAMME ON BASIC GRAMMAR

LISIEUX ENGLISH SCHOOL, NADEL VAIKOM

The training program on basic grammar took place on 26th March 2021. The aim of the training was to bring together for intensive discussion a number of people with practical experience in the development of large-coverage grammar and researchers who have investigated concepts and tools for grammar development. The workshop focused on the methodology of grammar engineering, testing and evaluation of grammar, the problem of distributed development, the formalisms and tools needed, and grammar maintenance and reusability. A variety of approaches to grammar writing were presented. Prerequisites for effective grammar engineering were identified.

Grammar Engineering is the development of linguistic knowledge bases with broad coverage to be employed in natural language systems. Our training focused on the development of basic grammar

The training program was inaugurated by school principal Fr. Sebastian Nazhiyampara. The session was handled by S4 MA students of Naipunnya School of Management and the session was successfully conducted. In this program, around 78 students have participated.
